With over 12 years of experience in web and mobile application development, I bring a diverse skill set that includes Web App, Mobile App, Web Training, SEO, and SMM. I am highly experienced in managing small teams, ensuring projects are delivered with dedication, efficiency, and excellence. I oversee the entire software development lifecycle—from initial requirement gathering to design, coding, testing, documentation, and implementation—ensuring high-quality, user-centric solutions.

I am proficient across multiple platforms (Windows, Mac, Linux) and highly skilled in technologies such as PHP, MySQL, HTML5, CSS, React, NodeJS, JavaScript, jQuery, JSON, XML, Ajax, Angular, and Ionic. My expertise also spans CMS platforms like WordPress, Laravel. Also, have good knowledge of Drupal, Moodle.

In addition to WordPress plugin development, I adhere to best practices in software development, including object-oriented design (OOD), client-server architecture, and self-test automation. My approach is rooted in delivering user-friendly, scalable, and cost-effective solutions on time and within budget, positioning me for a senior web developer role.
