EXPERIENCE SUMMARY

Around **12 years (10 years inside UAE.)** of experience in Web based software Development, Website & Mobile App Development.

Since 2011, I began my career as a PHP web developer and have progressively evolved into a full-stack Web and App Developer. My expertise includes WordPress development, web training, mobile app development, SEO, and social media marketing Full lifecycle of software, encompassing initial requirement gathering, design, coding, testing, documentation, and implementation. Additionally, I excel at managing small teams with dedication and efficiency, ensuring the successful delivery of projects.

1. I am currently employed as a Software Engineer at **Towe Media Middle East FZ LLC, Dubai**, since August 2019. In this role, I serve as a senior full-stack developer, contributing to the development and maintenance of websites and native Android and iOS applications. My work spans platforms such as WordPress Development, React, Node.js for backend services, and Flutter for mobile applications.

Role and Responsibilities:

- Collaborate with the manager to implement project requirements for both web and app platforms.
- Lead and manage a team of two members: a mobile developer and a web developer.
- Ensure seamless integration and functionality across all platforms, delivering high-quality solutions.

2. I worked as a Software Engineer at **Azizi Developments, Dubai**, from April 2017 to August 5, 2019. In this role, I served as a senior full-stack developer, contributing to the development of native Android and iOS applications and working with technologies such as Laravel, WordPress, Cordova, Ionic, Node.js, and React.

Role and Responsibilities:

- Managed a team comprising one web developer and one SEO expert.
 - Collaborated with the manager to implement project requirements for both web and app platforms.
 - Delivered high-quality solutions across multiple platforms, ensuring seamless functionality and user experience.
3. I worked as a Software Engineer at World of Electricals DMCC in Dubai from March 2015 to April 2017. My work primarily focused on the Laravel and WordPress platforms.

Role and Responsibilities:

- Managed all development activities for the company's websites and handled SEO tasks.
 - Supervised a team of two data entry personnel to ensure accurate and efficient data management.
 - Delivered robust solutions to enhance web functionality and optimize search engine performance.
4. I worked as a Full-Stack Web Developer at **Conqueror Information Technologies in Dubai** from September 2014 to March 2015. My role primarily involved WordPress development and customization.

Role and Responsibilities:

- Managed all development tasks for clients' websites, ensuring their specific requirements were met.
 - Engaged directly with clients to gather requirements and deliver presentations.
 - Delivered customized WordPress solutions to enhance user experience and meet business needs.
5. I worked as a Software Engineer at **Total Internet Solution Pvt. Ltd. in New Delhi** from August 2013 to August 2014. My primary focus was on WordPress and Drupal plugin development and customization.

Role and Responsibilities:

- Handled all development requests received from the Team Lead and occasionally from the Manager.
- Worked as a PHP backend developer, contributing to the creation and enhancement of plugins and backend functionalities.
- Delivered efficient and customized solutions to meet project requirements within tight deadlines.

6. I worked as a Web Programmer at **Reinforce Technology in New Delhi** from July 2011 to March 2013. My role involved website and web application development using CMS platforms such as WordPress, Moodle, and Drupal.

Role and Responsibilities: Developed and maintained websites and web applications using various CMS platforms.

KEY ACHEIVEMENTS AND EXPERIENCE

- Developed code based on specific requirements.
- Managed hosting servers, email servers, and domains.
- Provided troubleshooting, analysis, and solutions for clients' database and application issues.
- Wrote UI and business validations for assigned use cases.
- Created new WordPress plugins and themes while customizing existing ones.
- Managed multiple projects and led a team effectively.
- Demonstrated strong communication skills with the ability to learn and adapt quickly.
- Self-motivated and skilled at transitioning between technologies seamlessly.
- Extensive technical experience in building complex, multi-tiered web applications and interactive, database-driven websites.
- Strong understanding of client usability, staying updated with the latest design trends (Web 2.0), W3C standards, and methodologies.
- Expertise in web application development, website design and revamping, web hosting, secure payment gateway integrations, and implementing security solutions.
